

China on the road to success: H2O Kunshan moves to larger premises

Kunshan/China. After almost three and a half years at the Ecofactory, H2O Kunshan is moving to a new, larger building at the end of October.

"When we opened H2O Kunshan in 2015, we had 15 installations in China and we were three employees. Today, eleven of us service more than 60 systems. That's why our warehouse and office are becoming too small," explains Uwe Hanschke, Managing Director of H2O Kunshan.

In addition, according to the managing director, they want to have the best-selling systems in China on stock in order to be able to deliver faster.

The new building now has 270 m² of office space and around 1.700 m² of hall space. The new location is about 500 meters linear distance from the old location.

The new address can be found on the company's homepage: www.h2o-cn.cn.

About H2O GmbH – H2O GmbH nowadays forms part of the worldwide most experienced experts in the sustainable treatment and recirculation of industrial wastewater. With its efficient and safe VACUDEST vacuum distillation systems they achieve wastewater-free production for customers in more than 50 countries throughout the world.

Since the spin-off from Mannesmann Demag in 1999 H2O has, as an owner-operated company, been able to gain a growing number of loyal customers. More than 100 employees contribute to achieving this high customer satisfaction level from the headquarters in Steinen in south Germany and in the subsidiaries in Switzerland, Poland and China.
